Describe how you would develop object-oriented features of Java for the Quiz program developed in the Programming Assignments. In particular, describe how the program could use each of the following: class variables, instance variables, inheritance, polymorphism, abstract classes, "this", "super", interfaces, and event listeners.

Your Discussion should be at least **250 words** in length, but not more than 750 words. Once you've completed your initial post, be sure to respond to the posts of at least 3 of your classmates.
